

THIRTEENTH CENSUS OF THE UNITED STATES: 1910

DEPARTMENT OF  
COMMERCE AND LABOR

BULLETINS

BUREAU OF THE CENSUS  
E. DANA DURAND, DIRECTOR

POPULATION : NEW YORK CITY

NUMBER OF INHABITANTS, BY ENUMERATION DISTRICTS

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

This bulletin gives the population of New York City as now constituted, (1) by boroughs, from 1790 to 1910; (2) by boroughs and wards, from 1890 to 1910; and (3) by enumeration districts, for 1910 only.

The city of New York, as now constituted, consists of the five boroughs of Manhattan, Bronx, Brooklyn, Queens, and Richmond. The changes which have taken place in its organization and population since 1890 are explained as follows:

In 1890 the city comprised all of what is now the Borough of Manhattan and the greater part of what is now the Borough of Bronx, but under the act of consolidation which became effective January 1, 1898, Kings County, Richmond County, the larger part of Queens County, and a small part of Westchester County became a part of the city.

Manhattan Borough comprises all that part of the old city of New York lying to the south of the Harlem River, this area being known formerly as Manhattan Island.

Bronx Borough was formed from that part of the old city of New York lying to the north of the Harlem River and the small part of Westchester County annexed under the act of consolidation. All of this area was at one time a part of Westchester County, but in 1873 the towns of Morrisania, West Farms, and Kings Bridge were annexed to New York, and under the act which took effect January 1, 1898, all of the town of Westchester and parts of the towns of Eastchester and Pelham became a part of the city.

Under an act of the legislature the towns of Flatbush, Flatlands, Gravesend, and New Utrecht were absorbed by the city of Brooklyn in 1894, the town of Flatbush becoming the twenty-ninth ward, the town of New Utrecht the thirtieth ward, the town of Gravesend the thirty-first ward, and the town of Flatlands the thirty-second ward of the city. The city thus became coextensive with Kings County, and on January 1, 1898, under the act of consolidation above referred to, the city of Brooklyn became the Borough of Brooklyn, in what is now the city of New York.

Queens Borough was organized at the same time from what was Long Island City, the towns of Flushing, Jamaica, and Newtown, and a small portion of the town of Hempstead, all of which were civil divi-

sions of Queens County. The remaining towns of the county, Oyster Bay and North Hempstead, together with the greater part of the town of Hempstead, were taken to form the new county of Nassau. The first ward of Queens Borough comprises what was formerly Long Island City, the second ward what was formerly Newtown town, the third ward what was formerly Flushing town, the fourth ward what was formerly Jamaica town, and the fifth ward that part of the town of Hempstead now within the limits of the Borough of Queens.

Richmond County, known as Staten Island, under the provisions of the same act became the Borough of Richmond. The first ward of Richmond Borough comprises what was formerly Castleton town, the second ward what was formerly Middletown town, the third ward what was formerly Northfield town, the fourth ward what was formerly Southfield town, and the fifth ward what was formerly Westfield town.

It is impossible to state definitely the population at the earlier census periods of that part of the town of Hempstead, Queens County, which became a part of Queens Borough, and of the parts of the towns of Eastchester and Pelham, Westchester County, which became a part of Bronx Borough.

Table 1 gives the population of the present area of New York City and its boroughs as returned at the censuses of 1910 and 1900, and the estimated population for each decennial census period from 1790 to 1890.

From this table it appears that the area comprised within the present limits of the city of New York had an estimated population of 49,401 in 1790, as compared with a population of 4,766,883 in 1910. The population of the city in 1910 is more than ninety-six times its population in 1790, while that of New York state in 1910 is less than twenty-seven times its population in 1790, and that of continental United States in 1910 a little more than twenty-three times its population in 1790.

Table 2 gives the population of New York City, by boroughs and wards, as returned at the censuses of 1910, 1900, and 1890. For purposes of comparison, the population of certain wards in Brooklyn Borough for 1900 and 1890 are combined.

## STATISTICS OF POPULATION—NEW YORK CITY.

Table 3 gives the population of New York City by enumeration districts, as returned at the Thirteenth Census, taken as of April 15, 1910. In conformity to the plans of division for enumeration purposes, the

enumeration districts are arranged with respect to wards for Manhattan, Brooklyn, and Richmond Boroughs, and with respect to assembly districts for Bronx and Queens Boroughs.
